

## HoundHouse Installation Tips:

1. Remove the mat to easily view the metal frames.
2. Lay the kennel flat on the ground (diagram 1).
  - *Frames may have shifted during transportation. Ensure they are not crossed before attempting to assemble.*
3. While the kennel frames are flat, pull the frames out from all four corners approx. 6+ inches.
  - *Do not force, if poles are caught, look for obstructions or the rivet catching (diagram 2).*
4. Roll the frame onto the clip ABOVE the rivet (diagram A).
5. Stand the frames upright. Insert middle ridge tube into back of the HoundHouse frame with pointed end (diagram B).
6. Attach center bar off center and slide to the middle to tighten (diagram 3).
